

Compliance and Outcomes Auditing.

Level of Evidence	Moderate
-------------------	----------

Consensus Statement

Routine auditing and evaluation of perioperative process measure adherence and clinical outcomes is a necessary component of high-quality perioperative care.

Main Points

- Routine auditing of pathway adherence and clinical outcomes is necessary to evaluate whether ERAS elements are being delivered consistently.
- Registry participation and structured data collection help identify relationships between process compliance and outcomes such as complications and length of stay.
- Regular review of results supports iterative quality improvement and refinement of the perioperative pathway.
